

4H

We are class 4H and our teacher is Mrs Hormis.

We have been able to build some new friendships and make positive connections since the start of the school year. We have settled into class routines and are already working hard to improve our understanding of new concepts that we need to learn in Stage 2.

In terms 1 and 2 we will be investigating the History topic First Contacts. Within this unit, students will study issues related to Australia's original inhabitants, explorers before the British and the British arrival and occupation of Australia.

In Reading, we will be working hard to identify the main idea in texts and answer inferential questions. As well as, develop our ability to decode unfamiliar words and make connections between different texts and our own personal experiences.

During our literature circles every week, we will be implementing our quality talk strategies to discuss and explore our chosen quality texts including the several Goosebumps books written by R.L Stine.

In Writing, we will be exploring a range of texts including persuasive, imaginative and informative writing.

In Mathematics this term we will be focusing on different Number and Strand topics each week and challenging ourselves with new concepts.

On Thursday's this term 3H will visit Mr Post our very own music teacher to learn how to appreciate the musical arts.
