

4I have had a very busy and productive start to term 2!

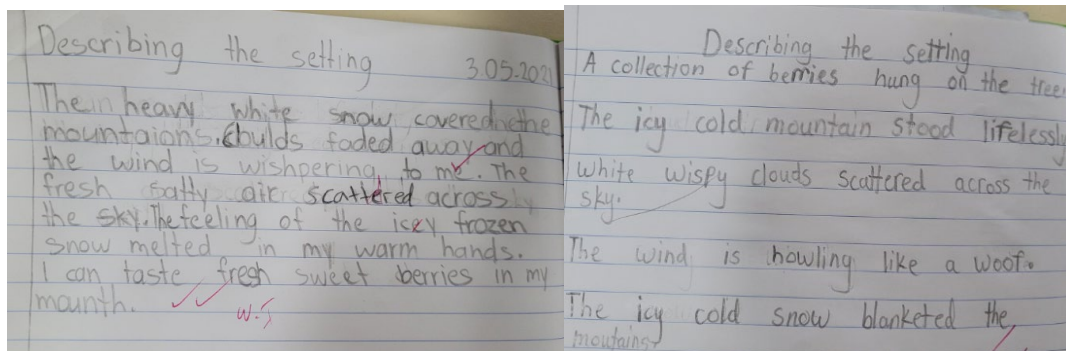

Students have enjoyed beginning to explore a range of quality texts to enhance their inferring skills, as well as being able to identify and utilise the structure of imaginative texts to apply in their writing.

Students have been reading the novel “Blueback” during our shared reading and have been having discussions around the language the author uses to engage us. Students have also been exposed to modern fairy tales to unpack the imaginative text structure and explore the moral of the stories.

Guided reading groups is also an important and enjoyable part of our classroom. Students explore quality texts, practice their inferring skills and are developing a love of literature.

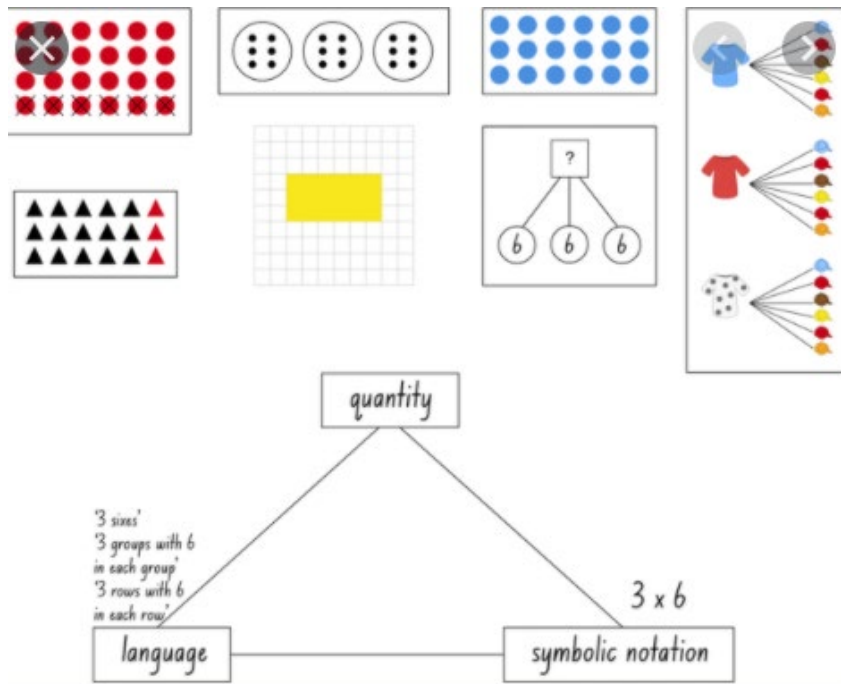

Students in 4I have impressed me with their use of descriptive language to write amazing descriptions of a variety of settings. I am looking forward to seeing their writing skills continue to grow.

4I continues to enjoy maths groups where they are involved in learning new concepts, consolidating learning and playing hands on mathematics games to enhance their multiplicative thinking.

In Mathematics this term we are really focussing on developing our knowledge of Addition, Subtraction, Multiplication and Division and solving Mathematics word problems. Each week we will be focussing on a particular set of times tables and investigating problem solving questions.

My Multiplication Tables < 1-12
